

Adobe e-Sign delivers signing flexibility and sharing via automated email. It provides a cloud service that circulates your digital documents for others to sign.

You must have completed and signed the document yourself before you can send it for signing by others. This signed document will be certified by Adobe eSign.

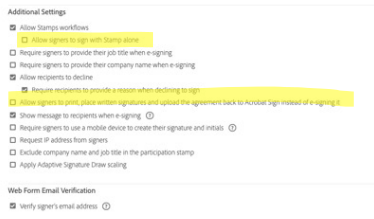

When you send something to sign, signers receive an email notification. You can track the entire signing process in the free Acrobat Reader application. Once signed, everyone gets emailed a document link.

If you receive an email request for a signature from someone using Adobe Sign, you can access the agreement from the link in your email or through Acrobat Reader desktop application.

The recipient can nominate another email address to take over. Once the document signed, they choose where the agreement goes next, even for more signatures.

Everything works the same except everyone has to print, sign, scan and upload the signed CMR. An open and print email with a link to the document is sent to all signatories

On Download another email for upload is sent with a link for eSign to accept the filled in and signed CMR back into the Adobe Cloud.

Digital IDs prove your electronic identity. You need a digital ID to sign an Adobe document or encrypt a PDFs through a certificate.. You can create a self-signed digital ID with Adobe or buy one from a specialist trusted seller.

Adobe signatures are saved in Adobe Cloud storage so they can be used across your desktop and all your mobile devices. You can show, change and sign a pdf on your phone.

Everyone needing to sign a CMR can use the free Adobe "Fill and Sign" tool. They can sign from anywhere using a web browser or mobile device. No Adobe purchases are needed.

Adobe Acrobat Reader software is the free, trusted global standard for viewing, printing, signing, sharing, and annotating PDFs. It's the only PDF viewer that can open and interact with all types of PDF content - including forms and multimedia.
